

Name: _____

Subtraction:

Count the objects, subtract and write the difference.

A subtraction problem using rocket icons. On the left, there are 6 rockets: 3 in the top row (blue, red, green) and 3 in the bottom row (pink, yellow, pink). Below them is a square box. In the middle is a minus sign. On the right, there are 4 rockets: 2 in the top row (red, green) and 2 in the bottom row (green, pink). Below them is a square box. To the right of these is an equals sign, followed by a large square box for the answer.

A subtraction problem using planet icons. On the left, there are 4 planets: 2 in the top row (dark blue, blue) and 2 in the bottom row (purple, light blue). Below them is a square box. In the middle is a minus sign. On the right, there are 3 planets: 2 in the top row (blue, purple) and 1 in the bottom row (light blue). Below them is a square box. To the right of these is an equals sign, followed by a large square box for the answer.

A subtraction problem using hat icons. On the left, there are 4 hats: 2 in the top row (blue, green) and 2 in the bottom row (teal, orange). Below them is a square box. In the middle is a minus sign. On the right, there are 4 hats: 2 in the top row (yellow, pink) and 2 in the bottom row (yellow, pink). Below them is a square box. To the right of these is an equals sign, followed by a large square box for the answer.
